

# PBWiki is Safe

In the Classroom

## You control your wiki

PBwiki makes it easy to control access to your wiki. Your wiki can be set to public or private – it's your choice.

Private wikis require a password for access, so only your students can access your information.

Whether public or private, your wiki always requires a password to edit. This ensures your wiki will never be edited with Viagra ads.

## No ads for educators

We know you don't want ads on your wiki, so we've removed them. Educational PBwikis are completely, totally, 100% ad-free.

Don't worry about your students clicking away to other sites. Your PBwiki is your own private environment that you control.

## Password Protected

All wikis are password protected. A password is always required to make edits, so you'll never have to worry about spam.

*PBwiki lets you create a free educational wiki in 30 seconds. (A wiki is a web page that multiple people can edit.) Use PBwiki to create your own safe online space where you and your students build a shared space to exchange files, collaborate on group projects, and share knowledge.*
